

# REFRACCIÓN DE LA LUZ

## LEY DE SNELL

$$n_1 \cdot \text{sen}(\hat{i}) = n_2 \cdot \text{sen}(\hat{r})$$

*Ley de Snell*

## REFLEXIÓN TOTAL – ÁNGULO LÍMITE

Si  $\hat{r} = 90^\circ \leftrightarrow \hat{i} = \hat{L}$ , entonces tenemos:

$$n_1 \cdot \text{sen}(\hat{i}) = n_2 \cdot \text{sen}(\hat{r}) \Rightarrow n_1 \cdot \text{sen}(\hat{L}) = n_2 \cdot \text{sen}(90^\circ) \Rightarrow \boxed{\text{sen}(\hat{L}) = \frac{n_2}{n_1}}$$
